## Description

LEVERAGE BLACKOUT REAR Performance Rever Boot	
re number hear book Srug, comfortable and durable the LEVERAGE BLACKOUT is what a rear rubber binding was always meant to be. We have improved the fit, comfort and quality of the Leverage binding. Like our okis, the new LEVERAGE BLACKOUT is built entirely in the USA utilizing only the best materials available.	
The LEVERAGE BLACKOUT rear boot is for the skine looking for a non-nonsense, flexible design that file very snig, keeping the skine connected to the ski, while still allowing a full 360 degrees of motion to the upper anklo. The best wort to use in devolving the performance of the LEVERAGE BLACKOUT rear boot is for the skine to fact the right rear boot to match with your REFLEX Hard-shell front or you are looking for a new boot in flop/way. If you have asserbed for the right rear boot to match with your REFLEX Hard-shell front or you are looking for a new boot that keeps your foot in place but is soft enough to allow the skine to focus the control on the front foot, look no further. Skines seeking more latenal support and a stiffer upper ankle design see our T-Factor near text but is soft enough to allow the skine to focus the control on the front foot, look no further. Skines seeking more latenal support and a stiffer upper ankle design see our T-Factor near text but is soft enough to allow the skine to focus the control on the front foot, look no further. Skines seeking more latenal support and a stiffer upper ankle design see our T-Factor near text but is soft enough to allow the skine to focus the control on the front foot, look no further stiffer upper and a stiffer up	
In keeping with D3's 'performance first' philosophy we use only screen printed graphics on the LEVERAGE BLACKOUT. Using molided rubber or plastic acoutrements as graphic elements can limit a bindings ability to stretch. This can also make a binding stiffer. For this reason we have stayed away from flashy graphics and bave focused on a clean, screen printed, all black look. A rear boot needs to have smooth clean lines to reduce water drag. The LEVERAGE BLACKOUT rear boot will not grab water in the turns.	
For the LEVERAGE BLACKOUT rear boot we have removed the plantic heat support found in the inori toot version. We chose to make this may boot as soll and floable as parable. We balave strongly that the majority of a size control should be provided by the from foot. By reducing the stiffness of the LEVERAGE BLACKOUT rear boot, we have strongly that the majority of a size control should be provided by the from foot. By reducing the stiffness of the LEVERAGE BLACKOUT rear boot, we have strongly and the majority of a size control should be provided by the from foot. By reducing the LEVERAGE BLACKOUT rear boot, we have strongly and the majority of a size control should be provided by the from foot. By reducing the LEVERAGE BLACKOUT rear boot, we have strongly and the majority of a size control should be plante to more formed and back, additionally one can move the boot fare evel be and every strong or very immed text. Back these stopping adjust the inter-body of the boot to revee the boot have reserve boot have reserve boot have reserve and boot have reserve and back.	
The LEVERACE BLACKOUT rear binding does not have laces. Our new overlay design features a generous opening making the LEVERAGE BLACKOUT easy to get into. Each low and heel nubber feature a sewn, padded, nyion strap handle which also facilitates easy entry and provides the ultimate in durability.
