

O'Brien GC 2023

Pro Level Performance The GC Titanium is a high-performance ski designed to amplify the skills of intermediate to pro-level skiers. The ski's bevels, rocker, and flex pair perfectly with the carbon layup to create a ski that is fast across the wakes and looking to gain angle throughout the course for wide and early turns. This is what every skier is looking for, and GC Titanium delivers it all without compromising the ski's turning ability. Maximize your potential in the course with the all-new GC Titanium.
