Description

JOBE BARON SLALOM SKI

The Jobe Baron slalom ski has been designed for carving and intermediate level slalom skiing. Jobe engineered the Baron with a slightly narrower tail which makes initiating turns easier because the back of the ski lays deeper in the water. This ski makes use of an edge-to-edge concave. This traditional slalom ski generates a true edge holding capability without reducing control due to a three-stage rocker. Binding not included!

- Foam Core
- 3 Stage flex pattern to give you stiffness where you need
- Edge-to-edge concave for better traction
- High press fiberglass molded
- Made with 100% solar power
- Recreational level slalom skis
- Standard aluminium slalom fin
- Width: 7,7" | 19,5 cm
