### Description

If you have been stand up paddle boarding for the last year or so and are looking to upgrade from a recreational board then look no further than the Jobe Neva SUP package deal. Fancy paddling all year round? In the snow, rain and wind...just layer up, or even better invest in a drysuit and then you will never have an excuse not to paddle again! Dress for the season and nothing can stop you, getting in tune with mother nature all year round.

Bigger is better right?! The 12.6 Neva SUP is a touring SUP which brings speed with it! The sharp nose rocker makes the SUP cut through the water like a hot knife through butter. Designed to float easily and glide over flat water in a stable though fast manner: the Neva's shape supports all experienced riders. When designing our SUP boards, we wanted quality, which is why we chose for our Heat Bonded Technology combined with our new X-Stitching Construction. This make our SUP boards lighter, stiffer and more durable in the long run. A touring board which can go the extra mile.
